DEFINITIONS:

W.E.=Western Electric
K.=Kellogg
S.C.=Stromberg Carlson
A.E.=Automatic Electric
S.A.=Swedish American
Am.E.=American Electric
LME=Ericsson

W/Q=wholesale quantity. This means that when we have a copy of a resale certificate in our files you are entitled to these prices. You also are entitled to these prices if you belong to one of the collectors clubs or are in business selling phones and other antiques or collectibles. Most important that you place repeated orders.

As is=as we get them, you get them, rusty, dirty, cruddy looking. You fix it up, clean it up, repair it, you make it work.

NOS=new old stock (unused).

PHONECO, INC. occupies a 4 story factory building with 41,500 square feet including offices; electronic lab; polishing & painting area; assembly; wiring & testing area; and shipping & storage areas.

It began in 1971 as a husband and wife team. In 1981 we received a refurbishers license and FCC registration. Today we employ approximately 50 full and part-time employees-who clean, repair, test, and assemble the various types of phones-antique to modern. Our customers are worldwide. We are mainly mail-order, shipping daily to phone stores, antique shops, novelty shops, collectors and individuals who just enjoy the romance of old phones. We offer a line of reproduction parts for old phones as well as some, old original parts. We also have accessories for house wiring-jacks, plugs, and wire. All phones are buffed, polished, wired and inspected before being sent out. The metal phones likewise are checked as to whether the old finish is nice enough to polish or painting needed. Brass & nickel plated parts are also polished. All of our phones can be used as an ordinary modern extension.

We take a great deal of pride in restoring an old telephone to working order again. As a service PHONECO will also refurbish and bring our customers phones to a "plug in ready" state. Just send us your treasure with your specifications and we will give you an evaluation and restoration estimate. Our electronic lab has developed several types of networks and warbler ringers for us to use in some of the phones.

Reasons to have an old phone:

1. Investment
2. Decorative
3. Nostalgia
4. Solid construction
5. Quality
6. Long lasting
7. Unique
8. Pride of ownership
9. Repairable

Phoneco Policies:

Warranty:

Phoneco, Inc offers a one year warranty for defects occurring under normal operating conditions. Return defective equipment (postage or freight prepaid) along with a copy of original sales receipt and description of the problem. Include return address and your phone number.

Minimum order:

-No minimum order. But orders under \$2 could result in \$5 handling charge plus shipping cost.

Payment terms:

-No checks accepted.
-C.O.D. will be cash, certified check, or money order ONLY!
-Phoneco reserves the right to require full or partial payment in advance.
-Visa, Master Card, American Express or Discover.

Repairs:

-We will repair and make your phone functional. We will give you a quote on all parts, repair and labor beforehand.
-Customers are encouraged to include a detailed description of the symptoms or trouble encountered with each piece of equipment, part and service required.
-A 30 day return limited warranty is provided on replacement parts and labor performed. This warranty covers defects resulting from normal use, excluding damage from shipment, handling, improper installation, or electrical fluctuations. Phoneco shall not be liable for any special or consequential damages, or for loss, or expense directly arising from the use of or the inability to use the repaired equipment. We will not be responsible for tampered with or misuse of phones. Equipment will be returned by UPS unless otherwise specified. Prices are subject to change without notice.

Damaged items:

-Notify UPS carrier immediately of damage. Ask for an inspection and claim form. Be sure to keep ALL cartons and packing until after inspection is made.

Questions and answers:

-We try to answer all questions that you may have related to phones and parts, and we are happy to make price quotes. Please return all past correspondence with future related correspondence. With all requests an SSAE is appreciated.

When ordering an "original", detail to us the extent (mod capsules to work electronically or original carbon granulars and magnetic guts).

Returned goods:

-Pack very well. Damages and repairs will be subtracted from refund.
-Bag all loose parts.
-Indicate who you spoke to at Phoneco.
-We accept returns, exchanges, and refunds.
-Please get our permission before returning an item.
-Special or custom phones made to order, are not returnable.
-We request items be returned in 30 days, if you are not satisfied.
-Our receiving department does not accept C.O.D. or collect shipment unless approved in advance. We will make refunds accordingly after inspection of items.
-We make all effort to accurately represent our offering, so that you know exactly what you are getting; however, occasionally misunderstandings still do occur and we don't want you to keep an item which you are unhappy with. **Customers generally pay shipping both ways.**

Order by phone, mail, fax or email:

-We appreciate orders by phone. Please don't call collect, we will not accept. Call us at 608-582-4124.
-Our fax number is 608-582-4593.
-Our email address is PHONECOINC@AOL.COM.
WEB PAGE:
<http://members.aol.com/phonecoinc>

Delivery:

-We prefer to ship UPS. Give us an address that UPS can deliver to. Keep in mind 1st day, 2nd day and 3rd day select is expensive. Any 1st or 2nd DAY AIR orders should be called in before noon.
-Rush orders are and extra \$3 charge.

Other information:

-For mail in orders, see order blank form. Item under 2 lbs. can or may be shipped by postage. Give us your postal delivery address.

We are on the list of refurbishers with F.C.C. under the name Phoneco. We have the second highest rating in Dunn & Bradstreet. All phones here have single line (private-line) ringers.

Prices subject to change without notice.

Many older phones were on party-lines and have party line ringers (frequency) in them. Therefore, to ring on today's lines the party line ringers have to be updated to single line ringers. Many times networks and receiver and transmitter elements also have to be updated. Cords can be your choice, cloth, coiled, or straight.

Phones are old unless noted.

Books, Posters, Afghans, Charts, Misc.:

Once Upon A Telephone.

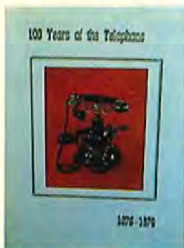

Every page has some sort of illustration such as a matchbook cover, blotter or sheet music depicting the telephone.

covered bottom, cloth
cords, an old type dial
with warbler inside.

PETKS short neck or
PETKT tall
neck...\$179.
W/Q \$119.

CANDLESTICKS:

All of the candlesticks work as an extension phone unless otherwise noted. Not F.C.C. approved nor do any of them have ringers in them as none were put in them originally unless otherwise noted. If you want your candlesticks to ring, we can install small warbler for \$8 additional cost; or a network warbler (called a candlestick network) for \$23. Ringer boxes are also available. See ringer box page. These are usually rigged up so that all you have to do is plug them into any jack and you have a ringer. If you would like the ringer box to be attached to the candlestick, we need to know how many feet of cordage is needed between phone & box. \$25 extra will be charged for this which includes cordage, network and labor.

Repro Candlesticks:

Solid brass (repros) assembled here and tested; cloth cords, and WE nameplate upon request. Does not ring. Ringer \$7. Network/warbler add \$23. Mostly U.S. made parts.

BS24 brass.....\$178.

transmitters.** Kellogg,
Stromberg Carlson, Automatic
Electric with element.
BULLB.....\$8 each.
Have a few Western Electric
with F1 capsule.
BULWE.....\$12.

Old **wiring harness** from wood
bell boxes. Comes w/coil &
capacitor Kellogg, Leich, SC, &
WE. HARN.....\$7 per set.

Two story as shown.
With dial installed rotary or
touch tone. Fully working.

2SWD.....\$291.
W/Q \$225.

2SWK as is kit.....\$150.

Bells on top like above
(2SWD) or bells on front
like below (2SND).

Two story woodwall 33"
tall & backboard 9"wide.
Some have bells on top.
2SND.....\$222.
W/Q \$159.

We have a good number
of mostly **cathedral top
picture frame fronters**.
These will be with nearly
all old parts, largely original
equipment.
CTPFF.....\$395 & up.

Rarer models are \$425
and up.

**Picture frame front
phone, various makes.**
PFF.....\$350.

Power supply.
Will ring your phones &
give you power for
intercom purposes for
around your house.
POWE1.....\$29.

Original about 1930
Connecticut made
over or refurbished by
Chicago Telephone &
Repair Company in
about 1940 or so. As
is. They are decent,
but could be refur-
bished (some of them).
7" wide and 5-3/4"
deep. A grille is at the
top on the door.

Behind this grille is a
single gong ringer. These could be made to
work with some ease and also made into an
older looking phone (separate transmitter and
receiver) with some ease.

CCTR.....\$75. 5 @ \$55 each.

If we refinish and make it work here, add \$50.,
and if we put a dial inside the door and make it
ring on your line, add \$70. We will gladly send
you parts for you to do the above as you wish.
Make into cute little phones w/separate
receiver & transmitter & little shelf.
Add \$75 for a total of \$250.

**Plain front
woodwall.** "Old"
(all old except mpc. &
rec cap).
PFWW.....\$295.
W/repro parts (trans.,
rec., shelf) & small
generators.
RPFW \$225.
When available 5 @
\$200 each.

We can wire your wood wall phone to work
with dial or touchtone inside.
WWASS.....\$100.
As an extension, answer only \$85.

We have numerous old original parts. We will
quote individual for these. We need to have
make of phone, measurement of hole pattern in
wood for such parts as magnetos, transmit-
ters, switches, arrestors, and ringers.

Fiddleback. Limited
time offer. These are
the common battery
type as they were
called back in the
early teens and used
an operator at central
to signal. You would
merely lift up on the
receiver and hear the
operator offer to
provide you service.
There was no need
for a magneto. WE
could install one for

\$35., but then it would not be original. FROM
THE MAGAZINE: TELEPHONY, January 17,
1914. Original.

**Oak Kellogg
FIDDK.....\$285.**

Some may be more ornate &/or be Dean.

Add \$25 for '37 style F1 handset.

Quite original. (Except door).

NICE WORKING PHONES FOR HOME USE: (phone which does not ring, but can answer when you hear another phone ring, also has snap in aluminum door available separately for \$8.)

20's style payphone with separate receivers & transmitters payphone. New/repro trans/rec added to a 50s style. Back, bottom & possibly tops are new. **PAY16.....\$279.** W/Q \$214.

Can also have same options as on the top of page 12.

The **Gray Mfg. Co.** name as shown below is stamped into the front above the door. We have used our best old equipment on these. The tops of these believed to be the oldest. Chrome bottoms & black tops. The hole is deep for dial. 1938 to 1948 or anywhere in between with Kellogg faceplate. More original than the Gray W.E. Includes old brass receivers. 90% original. **PAY10.....\$385.**

This tag actually reads "Gray Manufacturing" in chrome.

Old Western Electric 197 payphones. 233 & 234 are the most common then 223, 212 and 197. We offer them now with the older heavier F1 handset. These are bound to increase in value as the supply diminishes.

PAY7.....\$359. W/Q \$298.

Can also have the same options as on the top of page 12.

Western Electric 1942-55 payphone with original 101A induction coil F1 handset and prior to 197. Only a few left. **PAY7A.....\$440.**

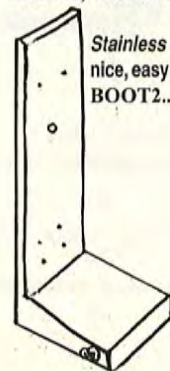

The below stamping: "**The Gray Telephone Pay Station Company and Western Electric Company, Inc. Makers**" will be above the door on these. Easy to date origin at prior to 1935, WE parted from Gray in 1934. Cloth cord, old W.E. transmitter and rec units. Unable to date exactly between 1920 & 1935. The body of the phone will be chrome plated. Sorry no black ones (can reluctantly grind the chrome and paint black for \$50 more). Body of phone original (cast top w/original holes). Includes cast orig coin gauge at top. 85% original.

PAY18.....\$495

As with any other antique, it is seldom that you can go down to the corner store and pick out a certain type that you are looking for when you want it. You usually have to take what you can get.

Such as it is with the Gray-Western payphones. 3 or 4 years ago, we acquired a small bunch which were chrome plated and updated in numerous other ways. 94% of these had the pre-1934 cast-iron top instead of the post-1934 steel top. 63% of the cast tops were of the fix pre-1920 makes where-by there had never been a socket prepared for the dial at the top. 95% or more of these had many holes drilled into the front, used to fasten an adaptor which held the dial and transmitter. All of them had been chrome plated, opening cut for a dial to recess into and the bell and gong brackets ground off.

Thus, we have available, chrome plated 1911-1934 pay phones. Likely, the top and the bottom are more synchronized in dating such as they are likely 1911 into 1920 models. Those bottoms made prior to 1917 were cast iron. It is not possible by any means we have heard of, to date them exactly between those years of 1917-1920.

Stainless steel boothette nice, easy to ship UPS. **BOOT2.....\$45.**

Oak telephone stand. Unfinished. PO75U.....\$75.00. Medium oak stain. **P075U.....\$95.00.**

(OLD!) #pay10 and #pay18 common with both phones may be cloth wired to work unless specify "no". Old 101A ind. coil used at least on some WE & old equipment [transm(except mpc) & rec] old guts left in, unless you wish new there and we can enclose the old in a sack (the old units will not work right under more than occasional use. The only thing repro is mpc & sw-hk. Partial wood strips. For either phones we have no orig. switch hooks.

COIN OPERATED CUSTOMER OWNED TELEPHONES: outgoing calls only, doesn't ring.

How many of your locations need a \$1000 phone with all the bells and whistles? Perhaps you don't go after the low volume residential laundromats. But, often those little places want a payphone, too! They don't need coin-long-distance, read outs, and other capabilities. All they need is a simple phone to call home on.

Oh, but you say, you need high-tech phones now, because you are going after the high buck location. While you are nosing around for those locations, don't you often run into situations where the client wants a phone, but doesn't want to pay the price? That's where our phone comes in.

What does this phone do?

Can be timed. Your discretion. Or not timed. You can adjust the timer from 1-1/2 to 5-1/2 minutes if you want. There will be a "beep" signaling that you have 18 seconds to either say bye-bye or deposit another coin. Or if you don't want it timed, just pull the little plug! Let them talk all day for a quarter.

Three choices for operator and information:

- A. Free.
- B. For a quarter.
- C. Not at all.

You can determine this by the little "switches" inside. You can switch on the operator or off the operator. You can select whether the operator is to come on for free or for a quarter! Just by switching! (Information restriction is achieved by restricting the #1). Mandatory free 911 emergency. Your choice of 8th digit restriction or not. But, remember if you make it unrestricted, then they can dial long-distance for a quarter.

COTBK black.....\$395.
COTCH chrome.....\$420.

Operates as follows:

1. Lift up handset (should have dial tone).
2. Dial number.
3. Deposit coin when part answers (this will switch transmitter to turn on so you can talk to the party).

Drawbacks:

1. Takes only 1 coin, not a combination.
2. Use for outgoing only (does not ring).
3. Does not return coin if you deposit coin first and get a busy signal or no answer.
4. Long distance calls can be placed only by operators, using calling card or collect call (timer is engaged to coin will be needed, unless you have unlimited time option).

The coin phone you own. The phone that pays you!

Mini COT.

MCOT.....\$225.

2nd choice, different from left phone, use this option for the fun of it:

Quarter relay add \$65. Old phones wired so you must put a quarter in to get transmitter to work. You would not be heard by the one you call until you drop the quarter in. You can call anywhere you want for a quarter for unlimited time. It will still show up as a long distance call on your phone bill. This option is only for the habit of fun using the quarter. This quarter relay can be applied to only A.E. payphones on page 10 for an extra \$65. To restrict long distance see left. Wired as extension, but can answer by hearing another phone ring; however you still have to deposit a coin to talk.

1893-1932 LME called *Eiffel or Skeletal*. The most naturally ornate phone made. May have repro mpc but ornate old wood connection block. (no teardrops or decalling) Refinished.

EIFFE.....\$1900.

Original but needs total refinishing.

EIFFU.....\$995.

Reproduction w/brass trim. Aluminum legs. Decals extra. Assembled price.

EIFFR.....\$249. W/Q\$199.

Full set authentic (as taken off of an original) water decals (19) gold, tan, turquoise. For skeletal phones.

SKED.....\$8.00.
450 at \$3.84 each.

Gold water decals to compliment an otherwise blah phone.

Gold L.M.E. decal 3X5.

LMEDE.....\$1.85.

10 @ \$1.75.

Business system or switch board.
BUSYS.....\$75.

Automatic Electric secretarial answering unit. This unit permits a secretary to answer and hold calls on lines by merely flipping the appropriate switch. Units are completely self contained and require no extra equipment. Use these for railroading and any other switching purpose!
AESEC.....\$10.

Keyphones-office phones. Call directors and 6-button sets. Tested here and nice blacks (beige call directors). CALDR.....\$39. As is \$10. Take all for \$4 each. (200). Converted to touch tone CALDT.....\$49.

AE 6 button. We've taken one of the most rugged phones ever made and turned it into a single-line residential phone with a light for you at night and a mute button for your privacy.
6BUTA.....\$39.

6BUTT.....\$39.
As is \$10.
10 @ \$6 ea.

Cute little transmitters. We have only the transmitters as shown above for the old (1962) W.E. speakerphone units.
TRANS.....\$5.

Switchbox SWBXL
large.....\$15.

Switchbox SWBXS
small.....\$13.

Switch & cradle handset holder. 7 wire.
HOLDER.....\$19.

Stromberg Carlson and Kellogg are almost identical; other than tiny details, the greatest being the way the transmitter is fastened to the box. These will have a new receiver and will come with the bulldog transmitter. Ringer inside.
SC14.....\$99.

Gray bakelite substation.
GRSUB.....\$15.

228A adaptor modular back plates for 554's or AE90's. Ivory, beige, white, brown, gold, black.
228A.....\$5.

S.C., K., W.E. ringer box.
RB25.....\$69.
Non WE as is \$29 each.

Field phone. A cute set. Strip the green off of the outer case and have a very attractive set. Even the pointed strap-hinges are a decorative plus. Part of it pulls out of the case snugly. This is a high quality unit. The bakelite cradle is typical of the 1930s styles. If you were to remove the part from the case and decorate it independently as a phone, it would be very attractive eye catcher.
FIELD.....\$49.

English cradle phone.
Chrome w/black cradle.
ENGRL.....\$259.
W/Q \$184.

Chrome w/black cradle and base.
